

List of Tables

1. Effectiveness of air passenger screening during recent travels	2
2. Awareness of changes to security procedures	3
3. Perceived change in length of airport security lines	4
4. Received or saw someone else receive a full body pat down	5
5. Received or saw someone else receive a full body scan	7
6. Comfort with full body scans after seeing full body scan images	9
7. Concerned about full body scan radiation	11
8. Comfort with full body scans after seeing full body scan images	12
9. Full body scanner machines at airports	14
10. Risk of terrorism justifies full body scans	16
11. Effectiveness of new air travel security measures	18
12. Decrease travel in response to security procedures	19

The Economist/YouGov Poll

November 27-30, 2010

1. Effectiveness of air passenger screening during recent travels

Do you think the passenger screening procedures that you saw the last time you flew were too tight or not tight enough? Asked of respondents who have flown at least once

	Number of flights in previous year					Number of flights in previous year		Reason for flying			Awareness of security changes		
	Total	0	1-2	3-6	7+	Three or more	Flown since November 1, 2010	Business	Leisure	Mix	A lot	A little	Nothing at all
Too tight	20.6%	19.7%	20.4%	23.2%	22.2%	22.8%	21.2%	30.3%	18.3%	24.8%	24.0%	14.0%	15.4%
About right	63.2%	62.6%	63.1%	67.5%	58.8%	64.5%	69.1%	60.7%	64.5%	63.3%	59.5%	71.9%	62.7%

9. Full body scanner machines at airports

Full body scans produce detailed pictures of travelers and items that are hidden on their bodies. It might have detected the explosives that were meant to be ignited on the Northwest flight from Amsterdam to Detroit last Christmas. But many privacy advocates have objected to them. The scanners would not detect items within a person's body. What is your opinion of the use of full body scanners at airports?

The Economist/YouGov Poll

November 27-30, 2010

Sponsorship	<i>The Economist</i>
Fieldwork	YouGov
Interviewing Dates	November 27-30, 2010
Target population	U.S. citizens, aged 18 and over.
Sampling method	Respondents were selected from YouGov's PollingPoint panel using sample matching. A random sample (stratified by age, gender, race, education, and region) was selected from the 2005–2007 American Community Study. Voter registration, turnout, religion, news interest, minor party identification, and non-placement on an ideology scale, were imputed from the 2008 Current Population Survey Registration and Voting Supplement and the Pew Religion in American Life Survey. Matching respondents were selected from the PollingPoint panel, an opt-in Internet panel.
Weighting	The sample was weighted using propensity scores based on age, gender, race, education, news interest, voter registration, and non-placement on an ideology scale. The weights range from 0.6 to 4.1, with a mean of one and a standard deviation of 0.58.
Number of respondents	1000
Margin of error	± 3.6% (adjusted for weighting)
Survey mode	Web-based interviews
