When it comes to super-rich individuals, taking into account that their behaviour may change as a result, do you think the government would be more likely to generate more tax revenue if they raised tax rates for the super-rich, or if they lowered tax rates for the super-rich?

And if the effect of raising taxes on super-rich individuals was that the government made less in tax revenue because super-rich individuals chose to leave the UK to avoid having to pay the tax rises, would you support or oppose raising such taxes?
