If every country in the world agreed to do the same, would you support
a global tax on peoples assets (that is, the total amount that people
own, rather than just their income, including property, savings and investments) if it was set up in the following way...
0.1-0.5 percent each year on people's assets up to 1 million Euros
$1 \%$ each year on people's assets between 1 and 5 million Euros
2\% each year on people's assets between 5 and 10 million Euros
$5-10 \%$ each year on people's assets above 10 million Euros
