Ed Miliband has said that he wants to reform Labour's relationship with the Unions by ending the way members of trade unions affilated to Labour automatically pay a fee to Labour unless they opt out, saying that in future only trade unions members who made a deliberate choice to join Labour would pay a fee.

Do you support or oppose these proposals?

In the past male children of the monarch took precedence over female children when it came to inheriting the throne (meaning a younger brother would have become King instead of their older sister). The law has now been changed so that men and women are treated equally in the line of succession to the throne.

Do you think men and women should be treated equally in the line of succession to the throne?

The government has appointed an independent commission to look at how to increase airport capacity in the South-East. This will not report until 2015.

Which of the following best reflects your view?

Britain's current system of submarine launched nuclear weapons, known as Trident, is coming to the end of its useful life and will soon have to be scrapped or replaced. The cost of replacing Trident has been estimated at 20 billion pounds.

Currently the Trident system has FOUR nuclear armed submarines. This means that at least one nuclear armed submarine can always be on patrol, even if others are undergoing maintenance or training, and therefore the country has a continuous nuclear deterrent.

One way of having a cheaper nuclear weapons system would be if a new system only had TWO nuclear armed submarines, meaning there could be times when both submarines were receiving maintenance or training and there was no nuclear armed submarine on patrol.

Which would you prefer?
