The current government have set up a panel of inquiry to look at how public institutions handled historic complaints of child sex abuse, chaired by Baroness Butler-Sloss, a retired High Court judge. They have also set up an inquiry into how the Home Office handled information it received about child abuse from the 1970s to the 1990s, led by Peter Wanless, the chief executive of the NSPCC.

How much confidence, if any, do you have that these two inquiries will fully investigate the matter?

Which of the following statements best reflects your view?

The discussion of the child abuse allegations is proportionate and measured and being done in the right way - there are genuine questions to be answered

Would you support or oppose a new law making it a legal requirement for teachers, doctors or social workers to report any suspicions of child abuse to police? This would mean that a teacher or other professional who suspected a child was had been abused, but did not report it to police, could face prosecution and a possible prison sentence.

Currently any strike action requires the approval of trade union members in a strike ballot, with a simple majority of those voting needed to call a strike. It has been suggested that the law should be changed so a strike requires the support of 50% of ALL the trade union members, whether or not they take part in the ballot. Would you support or oppose this proposal?
