Daily Survey: Confidence in Vote Being Counted

Interviewing Dates October 28 - 31, 2022

Target population U.S. Citizens, aged 18 and over.

Sampling method Respondents were selected from YouGov's opt-in Internet panel us-

ing sample matching. A random sample (stratified by gender, age, race, education, geographic region, and voter registration) was se-

lected from the 2019 American Community Survey.

Weighting The sample was weighted according to gender, age, race, education,

2020 election turnout and Presidential vote, baseline party identification, and current voter registration status. Demographic weighting targets come from the 2019 American Community Survey. Baseline party identification is the respondent's most recent answer given prior to March 15, 2022, and is weighted to the estimated distribution at that time (33% Democratic, 28% Republican). The weights range from 0.236 to 4.764, with a mean of one and a standard deviation of

0.463.

Number of respondents 1000

Margin of error \pm 3.4% (adjusted for weighting)

Survey mode Web-based interviews

Questions not reported 85 questions not reported.

1. Confidence in Own Vote Counted

How confident are you that your vote will be counted correctly in the upcoming general election? Asked of likely voters
