YouGov

Interviewing Dates December 16 - 17, 2015

Target population U.S. adults, aged 18 and over.

Sampling method Respondents were selected from YouGov's opt-in Internet

panel using sample matching. A random sample (stratified by age, gender, race, education, and region) was selected from the 2010 American Community Study. Voter registration was imputed from the November 2010 Current Population Survey Registration and Voting Supplement. Religion, minor party identification, and non-placement on an ideology scale, were imputed from the

2008 Pew Religion in American Life Survey.

Weighting The sample was weighted using propensity scores based

on age, gender, race, education, voter registration, and non-placement on an ideology scale. The weights range from 0.086 to 6.045, with a mean of one and a standard

deviation of 1.113.
