Universities are currently announcing the levels of fees they will charge under the new system of tuition fees. Under the new scheme, students will not have to pay tuition fees up front, but will pay them through a student loan which they will have to pay back after graduation once they are earning over £21,000 a year. It now appears that around two-thirds of universities will charge the maximum fee of £9000 a year.

Do you support or oppose this policy?
